

I think that xm radio was the best thing that came along .now that i moved to Jersey when you don`t have to much choice in what other states or people choice in what you can hear .see i like country when i got here they had only one station and in a little while here it was taken off the air or droped off because not most people here not caring to much for it .but as soon as i heard of xm radio and the instant weather and traffic makes good sense for truckers (see my brother is a trucker ) to be able to get it without listing to alot of other stuff and only being able to hear it when the station thinks it is important enought . so i think it`s great!!!
